

NEW LINE OF UNBREAKABLE CUPS AND GLASSES

MADE WITH TRITAN, LIGHT, RESISTANT, REUSABLE AND RECYCLABLE

New line of glasses and cups made of polycarbonate and BPA-free TRITAN © material. Produced with an exclusive system and a state-of-the-art material such as Tritan© BPA Free used in baby bottles, medical components, helmets, automotive, etc.

Very light and transparent material with an aesthetic appearance similar to glass but unbreakable. Ideal for environments such as swimming pools, gardens, terraces, discos, beaches, hotels, spas, restaurants, catering, nautical, etc... It maintains and does not distort the organoleptic properties of the products.
